Hill parking check: 22 blocks, evening

Prepared 2026-11-04 for the Berkeley Wildfire Evacuation Explorer. Every parking count the simulator uses comes from one daytime moment: the City's 2020 aerial photos, counted by Claude and not yet checked by a person. Parking at night is an assumption. These 22 blocks are the ones counted from the air: 5 streets you photographed earlier and 17 drawn at random from two-way hill blocks 70–220 m long. Counting them in person settles two things: whether the aerial counts are right, and how much fuller the blocks are at night.

When. A weeknight, Tuesday to Thursday, **9 to 11 p.m.**, when most residents are home: the simulator's fall-night case. Not on a holiday, a Cal home game night or a street-sweeping morning. If you can, repeat a few blocks on a weekday **1 to 3 p.m.**, the time of day the 2020 photos show, to separate a counting error from a day-and-night difference.
Where. Each block runs between the two cross streets named. "Path", "Walk" and "Steps" are footpaths; the block ends where the path meets the street. The coordinates are the middle of the block. The blocks are in driving order: the shortest route through all 22 on the City street network, one-way streets included, driving each block from one end to the other (about 18.9 km). Each leg link below opens that stretch in Google Maps; tap the next leg when you finish one.
Privacy. Photos help with counting, but only the counts are kept; frame them to avoid faces and license plates where you can.

Route

- Leg 1: blocks 1–5
- Leg 2: blocks 5–10
- Leg 3: blocks 10–14
- Leg 4: blocks 14–19
- Leg 5: blocks 19–22

What to write down for each block

- **Side 1 / Side 2:** parked cars on each side (pick either side as side 1; trucks and vans count as cars).
- **Pinches:** places where cars on both sides leave about one car's width or less to drive through.
- **Corners:** cars parked within about 20 ft (one car length) before a corner crosswalk, marked or not, on the side cars approach from, which state law has barred since 2024 (daylighting, Vehicle Code §22500(n)).
- **Signs / red curb:** posted no-parking signs or red curb on the block, and whether cars are parked against them.
- **Notes:** cars far from the curb or on the sidewalk, driveways or gates that limit parking, anything unusual.

#	Block	Size	2020 aerial count	Side 1	Side 2	Pinches	Corners / signs	Notes
1	**Grizzly Peak Blvd** drive from Summit Rd to Senior Ave 37.88258, -122.24868	89 m 32 ft wide	1 none; 30% under trees					

#	Block	Size	2020 aerial count	Side 1	Side 2	Pinches	Corners / signs	Notes
2	**Avenida Dr** drive from Fairlawn Dr to Queens Rd 37.88356, -122.25047	133 m 18 ft wide	3 one side; 40% under trees					
3	**Quail Ave** drive from Campus Dr to Northgate Ave 37.88636, -122.25547	106 m 21 ft wide	4 one side; 20% under trees					
4	**Bret Harte Rd** drive from Cragmont Ave to Keeler Ave 37.89009, -122.25965	227 m 17 ft wide	4 sparse, alternating sides; 35% under trees					
5	**Miller Ave** drive from Bret Harte Path to Latham Ln 37.89197, -122.25781	183 m 21 ft wide	10 one side; 10% under trees					
6	**Latham Ln** drive from Grizzly Peak Blvd / Latham Walk to Miller Ave 37.89317, -122.25855	155 m 21 ft wide	7 one side; 25% under trees					
7	**Poppy Ln** drive from Keeler Ave to Pinnacle Path 37.89257, -122.26122	139 m 22 ft wide	5 both sides on part; 35% under trees					
8	**Vistamont Ave** drive from Rosemont Ave to Rochdale Way 37.90298, -122.26523	123 m 18 ft wide	2 one side; 40% under trees					
9	**Euclid Ave** drive from Poplar St to Rock Walk 37.89695, -122.26564	187 m 32 ft wide	17 both sides on part; 25% under trees					
10	**Spruce St** drive from Santa Barbara Rd to San Benito Rd 37.89109, -122.26725	111 m 32 ft wide	10 both sides; 10% under trees					
11	**San Luis Rd** drive from Montrose Rd to Southampton Ave 37.89704, -122.27191	95 m 22 ft wide	0 none; 40% under trees					

#	Block	Size	2020 aerial count	Side 1	Side 2	Pinches	Corners / signs	Notes
12	**Southampton Ave** drive from San Luis Rd to Santa Barbara Rd 37.8975, -122.27214	117 m 22 ft wide	3 one side; 50% under trees					
13	**The Alameda** drive from San Antonio Ave / San Ramon Ave to Vallejo St 37.90003, -122.28046	152 m 24 ft wide	10 mostly one side; 30% under trees					
14	**The Alameda** drive from Vincente Walk to Menlo Pl 37.89921, -122.28122	113 m 24 ft wide	6 mostly one side; 50% under trees					
15	**Menlo Pl** drive from The Alameda to Visalia Steps 37.89878, -122.28208	70 m 24 ft wide	3 sparse, mixed; 30% under trees					
16	**Colusa Ave** drive from Vincente Ave / Portland Ave to San Lorenzo Ave 37.89414, -122.28181	82 m 34 ft wide	3 both sides, sparse; 30% under trees					
17	**San Lorenzo Ave** drive from Santa Rosa Ave to The Alameda 37.89549, -122.27919	115 m 26 ft wide	12 both sides on part; 15% under trees					
18	**Amador Ave** drive from Sutter St to Mariposa Ave 37.88781, -122.27216	103 m 32 ft wide	5 mostly one side; 20% under trees					
19	**Los Angeles Ave** drive from Mariposa Ave to Shattuck Ave 37.88948, -122.26918	83 m 30 ft wide	0 none; 20% under trees					
20	**Walnut St** drive from Alley to Eunice St 37.88723, -122.26905	194 m 32 ft wide	10 both sides on part; 25% under trees					
21	**Scenic Ave** drive from Rose St / Bay View Pl to Hawthorne Terrace Steps 37.88289, -122.26331	136 m 24 ft wide	22 both sides on most; 15% under trees					

#	Block	Size	2020 aerial count	Side 1	Side 2	Pinches	Corners / signs	Notes
22	**Parkside Dr** drive from Nogales St Steps / Nogales St to The Uplands Steps 37.85402, -122.2451	122 m 28 ft wide	2 unknown; 70% under trees					

Date: _____ Start time: _____ End time: _____ Weather: _____. Aerial counts: City of Berkeley 2020 3-inch orthophotos, counted 2026-11-01 (data/field/aerial-parking-counts-2020.json); "under trees" is the share of the block hidden by canopy, so the aerial count misses cars there.
